KEY QUALIFICATIONS

Electronics Engineer with a Master's in VLSI and Embedded Systems and expertise in PCB design, IoT, and embedded programming. Proficient in Cadence Virtuoso, Altium Designer, and Raspberry Pi, with experience in optimizing IC layouts and developing real-time IoT health monitoring systems. Strong problem-solving skills, aiming to contribute to innovative electronics and automation projects.

- 1 year of experience teaching and developing course materials for embedded systems and VLSI design.
- Published research in international journals on IoT-based health monitoring using machine learning.
- Certified in Python, IoT, and Raspberry Pi from University of Michigan and UC Irvine (Coursera).

WORK EXPERIENCE

07.2021 – 03.2022 Assistant Professort, Miracle Educational Society Group Of Institutions, Visakhapatnam, India

- Delivered lectures and lab sessions for undergraduate courses in Electronics and Embedded Systems.
- Guided student projects in embedded programming, PCB design, and IoT systems, fostering hands-on learning.
- Developed course materials for microcontroller programming and VLSI design, improving curriculum quality.

07.2019 – 09.2019 Intern / Electronics Engineer, Central Institute of Tool Design, Hyderabad, India

- Trained in VLSI IC physical design using Cadence Virtuoso, focusing on Standard Cell Design with GPDK 45nm, 90nm, and 180nm technologies.
- Performed floor planning, routing, and physical verification using Virtuoso Layout Editor, PVS, and Assura.
- Designed and verified layouts for logic cells, ensuring compliance with DRC and LVS rules.

EDUCATION

2019 – 2020 Master's in VLSI & Embedded Systems Design, GMR Institute of Technology, JNTU Kakinada, India

- Achieved GPA of 9.0/10, recognized under NOKUT.
- Focused on ASIC design, standard cell layout, and embedded systems development.

COURSES

2020 Programming for Everybody (Getting Started with Python), University of Michigan (Coursera), Online 2020 Python Data Structures, University of Michigan (Coursera), Online 2020 The Raspberry Pi Platform and Python Programming for the Raspberry Pi, University of California,

Irvine (Coursera), Online 2020 Introduction to the Internet of Things and Embedded Systems, University of California, Irvine (Coursera), Online

OTHER CERTIFICATES

- Certificate of Publication, International Journal of Innovative Research in Technology (IJIRT): "Health Monitoring System Using Machine Learning Techniques"
- Certificate of Publication, European Journal of Molecular & Clinical Medicine (EJMCM): "A Real-Time IoT-Based Patient Health Monitoring System Using Machine Learning Algorithms"

COMPUTER SKILLS

- Programming: C, Verilog HDL, VHDL, Python
- Tools: Cadence Virtuoso, LTspice, Altium Designer, PADS, OrCAD, Raspberry Pi
- Operating Systems: Microsoft Windows, Linux (Mentor Graphics)
- Simulation: Power Analysis, Timing Analysis, Physical Verification

VOLUNTARY WORK

- Helping organize college or school events
- Tutoring friends or juniors without pay

LANGUAGE

- English: Fluent (Written and Spoken)
- Norwegian: Basic proficiency

INTERESTS

- Learning new languages
- Traveling and cultural exploration
